

# Kids Home Helper Wheel

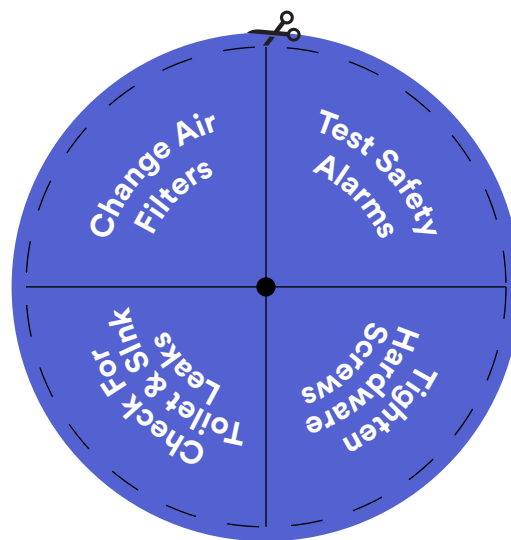

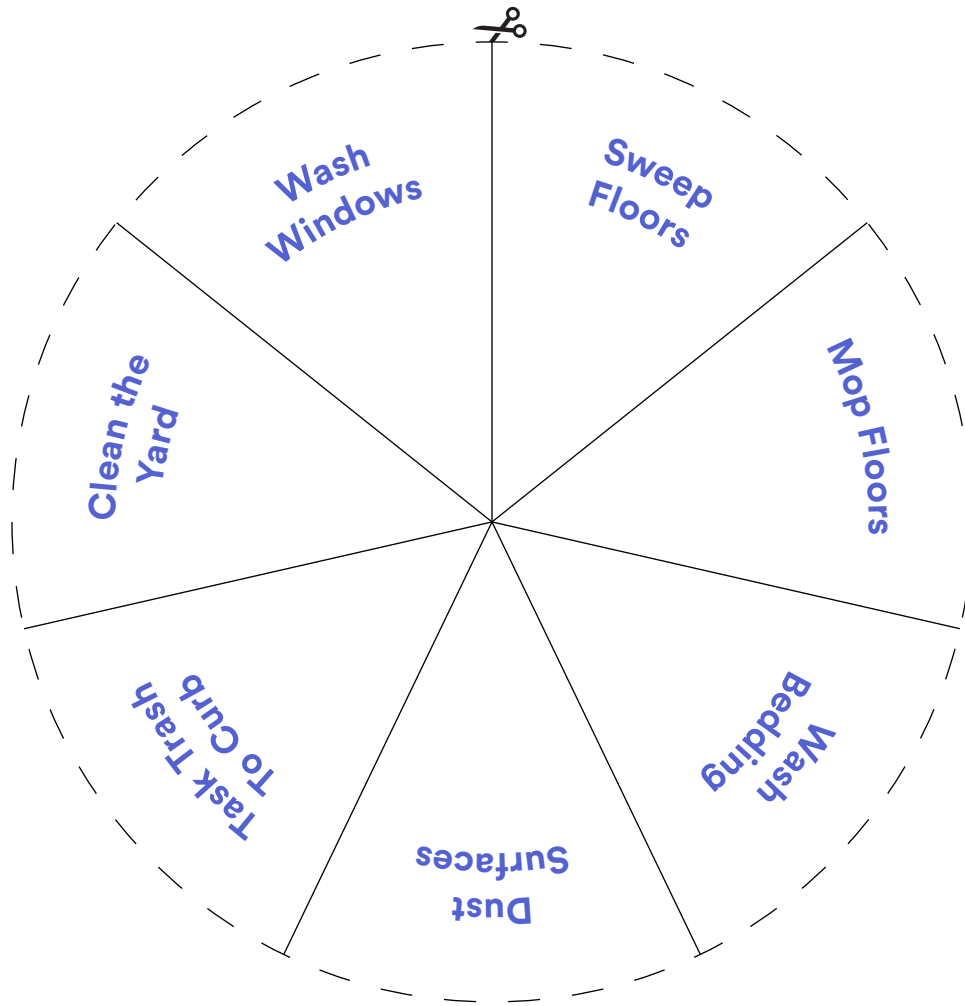

Track daily and weekly maintenance tasks with this home helper wheel. Keep your household running smoothly while teaching your kids valuable home maintenance skills.

## Instructions

1. Cut out each wheel and push a pin through the center dots to create a hole.
2. Press a hole through the center of a blank sheet of paper — feel free to color or decorate as you like!
3. Place the largest wheel on the paper, then the smallest wheel on top of the large wheel. Align the center holes.
4. Place a paper fastener through the center hole and secure it so each wheel can spin independently.
5. Draw an arrow or place a sticker above the wheels on the paper to identify daily and weekly chores.
6. Move the outer wheel daily and the inner wheel at the beginning of each week to track maintenance duties.
